Kick off back-to-school season seamlessly:

The middle/high school educator's guide to implementing Paper™

Paper's full-service educational support system provides tools that foster equitable and readily available academic support and career and college readiness. Below, middle and high school teachers can find insights and pointers into how Paper™ can empower them and their learners.

24/7 academic support across subjects

Live Help

On-demand and 1:1 tutoring from experts

- Students can start a session with a tutor anytime for help in most academic subjects. Tutors assess each student's level of understanding and ensure learners leave each session more knowledgeable and confident in their academic abilities.
- Live Help is an indispensable resource for assistance with in-class work, homework help, test prep, continued study, and knowledge retention.

Review Center

Comprehensive feedback on written work

- Students can submit their essays to Paper's Review Center to receive detailed annotations and constructive general feedback on essays, thesis statements, outlines, creative writing, résumés, lab reports, and college admission essays.
- Expert writing tutors focus on mechanical and holistic issues to help strengthen all aspects of a student's writing.
- Students can highlight areas of concern as well as attach instructions and rubrics to ensure the feedback they receive is relevant, helpful, and curriculum-aligned.

Opportunities for independent practice

Paper Missions
Math and vocabulary practice problems

- Students who need additional help with foundational math skills and math experts alike can try out Paper Missions: an interactive hub where they can practice vocabulary and math skills at their own pace—including pre-algebra, algebra I and II, geometry, and trigonometry.

Paper Reading
An independent reading practice tool

- Paper Reading drives literacy outcomes by listening to students practice reading aloud. Paper Reading provides immediate data-driven feedback students can act on while also helping educators identify differentiated reading levels and effortlessly monitor reading fluency over time.

Trackable student activity

The **Insights Dashboard** allows educators to see Paper in a quantified form. Teachers can view an aggregate of what's covered most in tutoring sessions, which students are using the platform, and other trends.

Expansive career and college readiness tools

MajorClarity by Paper
Students' one-stop career and college readiness shop

- From personality assessments that allow students to identify aligned careers and preferred learning styles to career simulations that "test drive" career pathways, MajorClarity by Paper prepares students for their journeys beyond K-12—whether that involves a college degree, the military, professional certification, or immediately entering the workforce.
- The MajorClarity by Paper partner hub provides subject-area lesson plans for educators to build directly into their curricula.
- Postsecondary exploration tools help students discover colleges and financial aid opportunities aligned with their career interests.
