

# Put Paper™ in students' pockets with our mobile app

With our **new mobile app**, Paper™ is now available directly from students' pockets! That means many of the great features of Paper's anytime, anywhere academic support travel with your learners wherever they need to go.

- Start a Live Help session with a tutor.
- Upload written assignments to the Review Center.
- Sharpen math and vocabulary skills with Paper Missions.
- Practice reading aloud with Paper Reading.
- Solve a math equation with Math Snap.

## How students benefit from the app

### A two-screen experience

Students often work from two devices simultaneously. For instance, they may complete an assignment on their laptop while quickly researching questions online from their phone. Paper's easy-to-use app helps students get this kind of quick mobile support whenever they need it.

### Instant updates

Students can get real-time updates on their essay submissions via push notifications or quickly message a tutor with a question if they prefer phone- and messenger-based communication.

### Equitable access

Paper's app provides support for students who don't have ready access to a laptop or desktop. It meets students exactly where they are—whenever they need extra help.

## Help students get support on the go!

To download the app, students can search for "Paper Education" on Apple's App Store or Google Play. You can also provide learners with this QR code to take them straight to the appropriate download pages.
